

PROJEKT

[Ref. SWX-6801]

Java Support Engineers (m/f)

About our costumer:

Our costumer, a renowend international company responsible for software products that meet high security and usability standards in international area, is currently searching for Java/DevOps Engineers (m/f) located in Vienna.

Your tasks:

We are looking for a team of Java Developers responsible for smaller change requests, finding and fixing bugs (acting between Support and Development team)

- Maintenance of daily operations
- Finding errors (in data and programs)
- Supporting 2nd and 3rd Level Support Team with bugs that cannot be solved on this level
- Fixing Bugs and supporting Development team with larger bugs
- Processing change requests
- Development in Java (frontend and backend)
- The troubleshooting / error analysis also includes databases, servers and infrastructure

Your qualifications:

- IT education (HTL, University, FH)
- Experience as a Java Developer
- Experience with configuration tools (Puppet, Ansible, etc.)
- Good English skills (spoken and written) – German is not required
- Willingness to work on large international IT projects (for several years)
- Nice to have:
 - Experience as DevOps/System Engineer
 - Scripting experience (Python, Shell, Powershell)

Our offer:

- Challenging and interesting business domains
- Flexible working-hours
- Attractive salary package
- Relaxed and friendly atmosphere
